LOUIS BRUN AMONG THE 20 ENTREPRENEURS IN THE 2021 C100 FELLOWS COHORT

Montréal, Québec, Canada, March 31, 2021 – Sollum Technologies' President and CEO, Louis Brun, has been selected to join the 2021 C100 Fellows cohort, a prestigious mentorship

program for Canadian entrepreneurs and founders of early-stage technology companies. He is the only entrepreneur from Québec to participate in this year's cohort.

The C100 organization brings together a community of Canada's most influential entrepreneurs, operators and investors in the technology space. C100's mission is to support, inspire and connect the most promising Canadian entrepreneurial leaders. C100 members provide hands-on, personalized support, which includes mentoring, knowledge sharing, access to networks, partnerships, and financing.

"I am honored to have been selected as a C100 fellow, an honor that reflects the work of Sollum and its team. Participating in the C100 fellowship program represents an exceptional opportunity for the growth of Sollum Technologies," commented Louis Brun. "C100 will provide access to the best entrepreneurial resources in the country, both here and far beyond our borders. I will be able to benefit from the advice of experienced mentors, one-on-one networking and the experience of successful founders in terms of leadership, culture, financing, growth, and more."

This exceptional mentorship program will start in May at a flagship event during which selected entrepreneurs will be introduced to mentors, investors, and industry leaders active on the global stage.

About Sollum Technologies

Inspired by nature, Sollum Technologies was founded in 2015 to offer greenhouse producers the only smart LED lighting solution which dynamically recreates and modulates the full spectrum of the Sun's natural light. The company is headquartered in Montréal (Québec, Canada), where its design, development, and manufacturing activities are concentrated. It works closely with its clients to create recipes adapted to each product, regardless of its native climate in the world and the location of the greenhouse. Sollum's lighting solution thereby provides unparalleled value in terms of energy savings, productivity, and superior produce quality through a flexible, adaptive, and easy-to-use application, with great respect for the environment. It was awarded the Solar Impulse Foundation Efficient Solution Label granted to only 1000 technologies in the world. For more information, visit sollum.tech.
